

Profit & Loss — hackathon period

19 May 2026 – 17 August 2026 · all amounts in USD · cash basis · individual entrant, no legal entity.

STATEMENT

LINE ITEM	AMOUNT
Revenue	\$0.00
Product / subscription revenue	\$0.00
Services revenue	\$0.00
Related-party revenue	\$0.00
Cost of goods sold	\$0.00
Gross profit	\$0.00
OPERATING EXPENSES	AMOUNT
AI development tooling (Claude subscription, used to build the agent)	\$240.00
Marketing and customer acquisition	\$0.00
Infrastructure and hosting	\$0.00
Other operating expenses	\$0.00
Total operating expenses	\$240.00
Net profit / (loss)	(\$240.00)

Why infrastructure is \$0. Every runtime dependency of the submitted product is on a free tier during the period: the Gemini API free tier for due diligence, Circle's developer sandbox for the agent wallet, and Arc Testnet for settlement, where the gas paid by the agent's own transactions totals roughly \$0.0016 in valueless testnet USDC. No paid infrastructure was consumed.

Pre-revenue by design at this stage. The agent's function during the period was to deploy capital autonomously, not to collect fees. Monetisation (paid due-diligence reports and a fee on funded deals) is described in the submission and has not yet been switched on, so no revenue is claimed.

I declare that this profit and loss statement is accurate and complete to the best of my knowledge.
