- Notes
- SG&A — software subscriptions (\$240).** AI development tooling (Claude subscription) used to build the agent: \$80 per month in June, July and August.
 - Revenue \$0.** During the period the agent *deployed* capital rather than collecting fees — it sent 1.5 USDC and 0.9 USDC autonomously on Arc, which are outflows. No payment processor is connected and no customer has been invoiced.
 - Infrastructure \$0.** Gemini API free tier (usage dashboard attached as product evidence), Circle's developer sandbox, and Arc Testnet. The agent's own on-chain fees total roughly \$0.0016 in valueless testnet USDC.
 - No personnel cost.** Single individual entrant; no salaries, contractors or related-party payments were made.

I declare that this profit and loss statement is accurate and complete to the best of my knowledge, and that it is prepared on a cash basis for the program period stated above.
